PROFILE INFO

As a proactive Information Technology graduate, I am passionate about problem-solving and continuously staying updated with cutting-edge technologies. My objective is to further enhance my skills and knowledge in a dynamic environment, equipping myself to meet the evolving challenges of the tech industry. I seek a responsible and challenging position with a progressive company where my talent and abilities can be effectively applied, contributing to the firm's growth and success.

WORK EXPERIENCE

■ Web Developer (TimeLines Software Agency)

- Worked on Customized based on client requirements to enhance customer relationship management processes.
- Diagnosed and resolved various issues and bugs to ensure system stability.
- Improved data management skills with notes save functionality.
- Utilized ReactJs, Tailwind and JavaScript to deliver theoretical projects.
- Contributed to the development of the Project Portal.

■ Web Developer (TechMaxSystems)

- In TechMaxSystems i start work as a frontend developer but there i learn Laravel and after few time i worked there frontend developer and also backend developer.
- Developed a E-Commerce project using HTML, CSS, TailwindCss, Laravel, MySQL, and jQuery with separate frontend and backend. Implemented admin and regular
- user roles with varying permissions for content management. Designed secure authentication, including password encryption and user authorization. Added
- functionality of Add Items and also use CRUD , recent reviews display, and a search feature. Ensured responsive design and optimized the platform for performance and
- usability.

■ Web Developer (Innvosol)^{Internship}

- Here i learn how to improve communication skills & Clear writing and speaking are essential for collaborating with teams and clients.
- I learn how to solve problems and find solutions to challenges.
- Here i worked on more than one projects and learn to submit work at time.
- I worked there on ReactJs and learn how to maintain code, reusability of code, Virtual DOM, Hooks, ReactRouter, Functions, state, props, modules, ReactContext, JSX, Spread, Arrays, destructuring, ternary. Here link of my portfolio [bdking-portfolio](#)
